		underlying index within a maximum permissible deviation of +/- 10%.	
	Portfolio rebalancing: As per Clause 3.5 of SEBI Master Circular dated June 27, 2024, the Scheme shall be considered to be replicating the index if the duration of the portfolio of the Scheme replicates the duration of the underlying index within a maximum permissible deviation of +/- 10%. Post any transactions undertaken in the scheme portfolio, in order to meet the redemption and subscription obligations, it shall be ensured that replication of the portfolio with the index is maintained at all points of time, subject to permissible deviations. The Fund Manager would monitor the Tracking Error of the Scheme on an ongoing basis and would seek to minimise the Tracking Error to the maximum extent possible. The annualised tracking difference averaged over one year period shall not exceed 2%. In case the average annualised tracking difference over one year period is higher than 2%, the same shall be brought to the notice of trustees with corrective actions taken by the AMC, if any. In case of change in constituents of the index due to periodic review, the portfolio of the scheme shall be rebalanced within 7 calendar days. In case the rating of any security is downgraded to below the rating mandated in the index methodology (including downgrade to below investment grade), the portfolio can be rebalanced within 30 calendar days. In case the rating of any security is downgraded to below investment grade, the said security may be segregated in accordance with Para 4.4.3.1 of SEBI Mutual Funds Master Circular No. SEBI/HO/IMD/IMD-PoD-1/P/CIR/2024/90 dated June 27, 2024 on "Creation of segregated portfolio in mutual fund schemes. Short term defensive consideration: As per para 1.14.1.2(b) of SEBI Master Circular on Mutual Funds dated June 27, 2024, the asset allocation pattern indicated above may change for a short term period on defensive considerations, keeping in view market conditions, market opportunities, applicable regulations and political and economic factors. These proportions may vary depending upon the perception of the Fund Manager, the intention being at all times to seek to protect the interests of the Unit holders. Such changes in the investment pattern will be rebalanced within 7 calendar days from the date of deviation and further action may be taken as specified under SEBI Circulars/ AMFI guidelines issued from time to time. Tracking Error: The Scheme, in general, will hold all the securities that constitute the underlying Index in the same proportion as the index. Expectation is that, over a period of time, the tracking error of the Scheme relative to the performance of the Underlying Index will be relatively low. The AMC would monitor the tracking error of the Scheme on an ongoing basis and would seek to minimize tracking error to the maximum extent possible. Under normal market circumstances such tracking error is not expected to exceed 1.25% p.a for daily 12 month rolling return. However, in case of events like, dividend received from underlying securities, and market volatility during rebalancing of the portfolio following the rebalancing of the Underlying Index, etc. or in abnormal market circumstances, the tracking error may exceed the above limits. Since the Scheme is an exchange traded fund, it will endeavor that at no point of time the Scheme will deviate from the index.
