- Income Distribution cum Capital Withdrawal option (Payout/Reinvestment)

Note: IDCW amounts can be distributed out of investors capital (Equalization Reserve), which is part of sale price that represents realized gains.

IDCW distribution is at the discretion of the Trustees and subject to available distributable surplus. However, the Trustee reserve the right to introduce / modify investment Plans / Options under the Scheme at a future date in accordance with SEBI (MF) Regulations.

All plans/options will have a common portfolio.

Investment objective :

The investment objective of the Scheme would be to generate long term Capital appreciation and current income with reduced volatility by investing in a judicious mix of a diversified portfolio of equity and equity related investments, debt and money market instruments.

Liquidity :

Being an Open-Ended Scheme, Units may be purchased or redeemed on every Business Day at NAV based prices, subject to provisions of exit load, if any.

Units can be redeemed (i.e. sold back to the Mutual Fund) on or Switched out (i.e. to another scheme of the Mutual Fund or Option(s) offered within the Scheme, if any) every Business Day, at the Applicable NAV subject to applicable Load, if any. The Units of the Scheme will not be listed on any exchange, for the present. Under normal circumstances, the transfer of redemption or repurchase proceeds to the unitholders shall be made within three working days from the date of redemption or repurchase (however, in case of exceptional situations specified by AMFI in its letter no. AMFI/ 35P/ MEM-COR/ 74 / 2022-23 dated January 16, 2023 additional timelines allowed in the said AMFI letter shall be considered for transfer of redemption or repurchase proceeds to the unitholders). Interest for the period of delay in transfer of redemption or repurchase proceeds shall be payable to unitholders at the rate of 15% per annum along with the proceeds of redemption or repurchase if the redemption or repurchase proceeds are not transferred within three working days from the date of redemption or repurchase and within specified additional timeline (in exceptional situations) mentioned above. Such Interest shall be borne by AMC.

Transparency/NAV /Portfolio Disclosure :

The AMC will calculate and disclose the first NAV of the respective plans not later than 5 business days from the date of allotment of the respective plans. The Mutual Fund shall prominently disclose the Net Asset Value of the scheme on every business day under a separate head on the website of the AMC "www.shriramamc.in" as well as on AMFI's website "www.amfiindia.com" by 11:00 p.m of the same day. This time limit may be revised based on any amendment as introduced by SEBI for uploading NAV from time to time. If the NAVs are not available before commencement of business hours on the following day due to any reason, the Fund shall issue a press release providing reasons and explaining when the Fund would be able to publish the NAVs. NAV shall be calculated on all business days. In addition, the NAV for all business days will be available at our Branch Offices. Further, Mutual Fund/ AMC shall extend facility of sending latest available NAVs to unit holders through SMS, upon receiving a specific request in this regard.

Pursuant to Para 5.1.1 of SEBI Mutual Funds Master Circular No. SEBI/HO/IMD/IMD-PoD-1/P/CIR/2023/74 dated May 19, 2023 the AMC shall disclose portfolio (along with ISIN) as on the last day of the month / half-year for the scheme on AMC website and on the website of AMFI within 10 days from the close of each month/ half-year respectively in a user-friendly and downloadable spreadsheet format.

In case of unit holders whose e-mail addresses are registered, the Mutual Fund/ AMC shall send via email both the monthly and half-yearly statement of scheme portfolio within 10 days from the close of each month/ half-year respectively.

Mutual Fund/ AMC shall publish an advertisement every half-year disclosing the hosting of the half-yearly statement of its scheme portfolio on the AMC website and on the website of AMFI and the modes such as SMS, telephone, email or written request (letter) through which a unit holder can submit a request for a physical or electronic copy of the statement of scheme portfolio. Such advertisement shall be published in the all India edition of at least two daily newspapers, one each in English and Hindi.

Mutual Fund/ AMC shall provide a physical copy of the statement of its scheme portfolio, without charging any cost, on specific request received from a unit holder.

I. INTRODUCTION

A. RISK FACTORS

I. Standard Risk Factors :

1. Investment in Mutual Fund Units involves investment risks such as trading volumes, settlement risk, liquidity risk, default risk including the possible loss of principal.
2. As the price / value / interest rates of the securities in which the scheme invests fluctuates, the value of your investment in the scheme may go up or down.
3. Past performance of the Sponsor/AMC/Mutual Fund does not indicate or guarantee the future performance of the scheme of the Mutual Fund.
4. Shriram Aggressive Hybrid Fund is only the name of the Scheme and does not in any manner indicate either the quality of the Scheme, its future prospects or the returns. Investors therefore are urged to study the terms of the Offer carefully and consult their tax and Investment Advisor before they invest in the Scheme.
5. The sponsor is not responsible or liable for any loss resulting from the operation of the scheme beyond the initial contribution of Rs. 1 Lakh made by it towards setting up the Fund.
6. The present scheme is not a guaranteed or assured return scheme.
7. There is no assurance or guarantee that the objective of the mutual fund will be achieved.
8. There is no guarantee or assurance on the frequency or quantum of IDCWs (which shall be at the discretion of the AMC/Trustee and also depend on the availability of adequate distributable surplus) although there is every intention to declare IDCWs in Income Distribution cum Capital Withdrawal option.
9. Mutual Fund Investments are subject to market risks, read all scheme related document carefully.

II. Scheme Specific General Risk Factors :

Some of the specific risk factors related to the scheme include but are not limited to the following :

1. The performance of the scheme may be affected by the corporate performance, macro-economic factors, changes in Government policies, general levels of interest rates and risk associated with trading volumes, liquidity and settlement systems in the securities markets.
2. Low trading volumes, settlement periods and transfer procedures may restrict the liquidity of the scheme's investments. Transacting may become difficult due to extreme volatility in the market resulting in constriction in volumes. Additionally, changes in the SEBI/ RBI regulations/Guidelines may have an adverse impact on the liquidity of the scheme. Different segments of the Indian financial markets have different settlement periods, and such period may be extended significantly by unforeseen circumstances. The length of time for settlement may affect the Scheme in the event the Scheme has to meet an inordinately large number of redemption requests. In addition, the Trustee at its sole discretion reserves the right to limit or withdraw sale and/or repurchase/redemption and/or switching of the units in the scheme (including any one of the Plans of the scheme) temporarily or indefinitely under certain circumstances. For details refer the Section '**Right to limit redemptions**'. The scheme will retain certain investments in cash or cash equivalent for the day to day liquidity requirements.

III. Risk associated with investments in equities and equity related instruments :

1. **Market Risk :** The scheme proposes to invest in equity and equity-related securities. Prices, trading volumes, settlement periods and transfer procedures may restrict liquidity of investments in equity and equity-related securities. Market risk is a risk which is inherent to an equity investment.
2. **Liquidity Risk :** Risk will be monitored in terms of the number of days it takes to liquidate every stock in the portfolio assuming a share of the average volume traded over the previous one year. Efforts would be made to keep the average liquidation period under prudent limits prescribed internally. While securities that are listed on the stock exchange carry lower liquidity risk, the ability to sell these investments may be limited by overall trading volumes of the stock exchanges.
3. While mid cap and small cap stocks give one an opportunity to go beyond the usual large blue chip stocks and present possible higher capital appreciation, it is important to note that mid/small cap stocks can be riskier and more volatile on a relative basis. Therefore, the risk levels of investing in small cap and mid cap stocks is more than investing in stocks of large well-established companies
Please note that over a time these two categories have demonstrated different levels of volatility and investment returns and it is important to note that generally, no one class consistently outperforms the others. While smaller and medium size companies may offer substantial opportunities for capital appreciation, they also involve substantial risks. Historically, these companies have been more volatile in price than larger company securities, especially over the short term. Among the reasons for the greater price volatility are the less certain growth prospects of smaller companies, the lower degree of liquidity in the markets for such securities, and the greater sensitivity of smaller companies to changing economic conditions. Smaller companies carry large amount of liquidity risk compared to the Large Cap companies, as the ability to sell is limited by overall trading volume in the securities, which it invests. In addition, smaller companies may lack depth of management, be unable to generate funds necessary for growth or development, or be developing or marketing new products or services for which markets are not yet established and may never become established. They could also suffer from disadvantages such as - outdated technologies, lack of bargaining power with suppliers, low entry barriers and inadequate management depth. Overall, the risks of investing in medium/small companies are (a) transparency/liquidity levels may not be on par with established, large companies; (b) corporate governance may be an issue with some companies; and (c) they may not be resilient enough to withstand shocks of business/economic cycles.
4. Securities which are not quoted on the stock exchanges are inherently illiquid in nature and carry a larger liquidity risk in comparison with securities that are listed on the exchanges or offer other exit options to the investors, including put options. The AMC may choose to invest in unlisted securities that offer attractive yields within the regulatory limit. This may however increase the risk of the portfolio. Additionally, the liquidity and valuation of the Scheme's investments due to its holdings of unlisted securities may be affected if they have to be sold prior to the target date of disinvestment.
5. The scheme may invest up to 5% of its net assets in unlisted equity and equity related instruments which could affect the liquidity of the scheme

IV. Risks associated with investments in debt and money market instruments :

1. **Interest rate risk:** This risk results from changes in demand and supply for money and other macroeconomic factors and creates price changes in the value of debt instruments. Consequently, the Net Asset Value of the scheme may be subject to fluctuation. Changes in the interest rates may affect the Scheme's Net Asset Value as the prices of securities generally increase as interest rates decline and generally decrease as interest rates rise. Prices of long term securities generally fluctuate more in response to interest rate changes than do short-term securities. Indian debt markets can be volatile leading to the possibility of price movements up or down in fixed income securities and thereby possible movements in the NAV. This may expose the schemes to possible capital erosion.
2. **Credit risk or default risk:** This refers to the risk that an issuer of a fixed income security may default (i.e. will be unable to make timely principal and interest payments on the security). Default risk / credit risk arises due to an issuer's inability to meet obligations on the principal repayment and interest payments. Because of this risk corporate debentures are sold at a yield above those offered on Government Securities,

which are sovereign obligations and free of credit risk. Normally the value of a fixed income security will fluctuate depending upon the changes in the perceived level of credit risk as well as any actual event of default. The greater the credit risk, the greater the yield required for someone to be compensated for the increased risk.

3. **Liquidity or Marketability Risk:** This refers to the ease with which a security can be sold at or near to its valuation yield-to-maturity (YTM). The primary measure of liquidity risk is the spread between the bid price and the offer price quoted by a dealer. Liquidity risk is today characteristic of the Indian fixed income market.
4. **Market risk :** This risk arises due to price volatility due to such factors as interest sensitivity, market perception or the credit worthiness of the issuer and general market liquidity, change in interest rate expectations and liquidity flows. This may expose the schemes to possible capital erosion.
5. **Reinvestment risk :** This risk refers to the interest rate levels at which cash flows received for the securities in the Scheme is reinvested. Investments in debt instruments are subject to reinvestment risks as interest rates prevailing on interest or maturity due dates may differ from the original coupon of the bond, which might result in the proceeds being invested at a lower rate. The additional risk from reinvestment is the "interest on interest" component. The risk is that the rate at which interim cash flows can be reinvested may be lower than that originally assumed.
6. Certain fixed income securities give an issuer the right to call its securities, before their maturity date, in periods of declining interest rates. The possibility of such pre-payment risk may force the fund to reinvest the proceeds of such investments in securities offering lower yields, thereby reducing the fund's interest income.
7. Different types of securities in which the scheme would invest as given in the Scheme Information Document carry different levels and types of risks. Accordingly the scheme's risk may increase or decrease depending upon its investment pattern.
E.g. corporate bonds carry a higher amount of risk than Government securities. Further even among corporate bonds, bonds which are AAA rated are comparatively less risky than bonds which are AA rated.
8. The scheme may invest in non-publicly offered debt securities. This may expose the scheme to liquidity risks.
9. Money market securities, while fairly liquid, lack a well-developed secondary market, which may restrict the selling ability of the scheme.

V. Risks associated with Investing in Derivatives :

1. Derivatives are high risk, high return instruments as they may be highly leveraged. A small price movement in the underlying security could have a large impact on their value and may also result in a loss. The risks associated with the use of derivatives are different from or possibly greater than, the risks associated with investing directly in securities and other traditional investments.
2. Derivative products are leveraged instruments and can provide disproportionate gains as well as disproportionate losses to the investor. Execution of such strategies depends upon the ability of the fund manager to identify such opportunities. Identification and execution of the strategies to be pursued by the fund manager involve uncertainty and decision of fund manager may not always be profitable. No assurance can be given that the fund manager will be able to identify or execute such strategies.
3. While Futures markets are typically more liquid than the underlying cash market, there can be no assurance that ready liquidity would exist at all points in time for scheme to purchase or close out a specific futures contract.
4. In case of buying options either call/put, the maximum loss would be the premium paid in case of options expiring out of the money.
5. The risks associated with futures are similar to those associated with equity investments. Additional risks could be on account of illiquidity and potential mis-pricing of the futures and the inability of derivatives to correlate perfectly with underlying assets, rates and indices.
6. The Long position in the Nifty will have as much loss as the gain in the short portfolio if hedged completely and would be vice versa if we were holding long portfolio, short Index.
7. The Stock Exchange may impose restrictions on exercise of options and may also restrict the exercise of options at certain times in specified circumstances and this could impact the value of the portfolio.
8. The Scheme may find it difficult or impossible to execute derivative transactions in certain circumstances. For example, when there are insufficient bids or suspension of trading due to price limit or circuit breakers, the Scheme may face a liquidity issue.
9. Interest rate swaps and FRA require the maintenance of adequate controls to monitor the transactions entered into, the ability to assess the risk that the derivative adds to the portfolio and the ability to forecast failure of another party (usually referred to as the "counter-party") to comply with the terms of the derivatives contract. Other risks in using derivatives include the risk of mis-pricing or improper valuation of derivatives, the credit risk where the danger is that of a counter-party failing to honor its commitment, liquidity risk where the danger is that the derivative cannot be sold at prices that reflect the underlying assets, rates and indices, and price risk where the market price may move in adverse fashion.

VI. Risks for Writing Covered Call Options for Equity Shares

A call option gives the holder (buyer) the right but not the obligation to buy an asset by a certain date for a certain price. Covered calls are an options strategy where a person holds a long position in an asset and writes (sells) call options on that same asset to generate an income stream. The Scheme may write call options under covered call strategy, as permitted by the regulations.

Risks associated thereto are mentioned below:

- a. Writing call options are highly specialized activities and entail higher than ordinary investment risks. In such investment strategy, the profits from call option writing is capped at the option premium, however the downside depends upon the increase in value of the underlying equity shares. This downside risk is reduced by writing covered call options.
- b. The Scheme may write covered call option only in case it has adequate number of underlying equity shares as per regulatory requirement. This would lead to setting aside a portion of investment in underlying equity shares. If covered call options are sold to the maximum extent allowed by regulatory authority, the scheme may not be able to sell the underlying equity shares immediately if the view changes to sell and exit the stock. The covered call options need to be unwound before the stock positions can be liquidated. This may lead to a loss of opportunity, or can cause exit issues if the strike price at which the call option contracts have been written become illiquid. Hence, the scheme may not be able to sell the underlying equity shares, which can lead to temporary illiquidity of the underlying equity shares and result in loss of opportunity.
- c. The writing of covered call option would lead to loss of opportunity due to appreciation in value of the underlying equity shares. Hence, when the appreciation in equity share price is more than the option premium received the scheme would be at a loss.
- d. The total gross exposure related to option premium paid and received must not exceed the regulatory limits of the net assets of the scheme. This may restrict the ability of Scheme to buy any options.

Risk Mitigation Factors :

Equity :

- **Liquidity Risk :** The fund will try to maintain a proper asset-liability match to ensure redemption payments are made on time and not affected by illiquidity of the underlying stocks.
- **Concentration Risk :** The scheme will be investing in a well diversified equity portfolio across industry sectors the risk of any one or few industry sectors underperforming or generating below market returns can be mitigated. Therefore as part of the Fund Management process it will always be our strategy to invest in a wider basket of equity stocks with representation from a multitude of industry sectors such that there is no concentration of investments in Securities in one or a few sectors and also based on market conditions the fund manager would

use his discretion and judgment to be overweight, underweight or equal weight on certain sectors based on their respective market outlook.

- Generally, diversification across market cap segments also aids in managing volatility and ensuring adequate liquidity at all times.
- Derivatives Risk : The fund will endeavor to maintain adequate controls to monitor the derivatives transactions entered into.

Debt

- Interest Rate Risk : The Fund seeks to mitigate this risk by keeping the maturity of the schemes in line with the interest rate expectations.
- Credit risk or default risk : The Fund would predominantly invest in high investment grade fixed income securities rated by SEBI registered credit rating agencies. Historical default rates for investment grade securities (BBB and above) have been low.
- Reinvestment Risk : Reinvestment risks will be limited to the extent of coupons received on debt instruments, which will be a very small portion of the portfolio value.
- The schemes may take positions in interest rate derivatives to hedge market/interest rate risks.
- Liquidity or Marketability Risk : The fund will endeavour to minimise liquidity risk by investing in securities having a liquid market.

B. REQUIREMENT OF MINIMUM INVESTORS IN THE SCHEME

The Scheme(s)/Plan(s) shall have a minimum of 20 investors and no single investor shall account for more than 25% of the corpus of the Scheme(s)/Plan(s) (at portfolio level). However, if such limit is breached during the NFO of the Scheme, the Fund will endeavour to ensure that within a period of three months or the end of the succeeding calendar quarter from the close of the NFO of the Scheme, whichever is earlier, the Scheme complies with these two conditions. In case the Scheme / Plan(s) does not have a minimum of 20 investors in the stipulated period, the provisions of Regulation 39(2)(c) of the SEBI (MF) Regulations would become applicable automatically without any reference from SEBI and accordingly the Scheme / Plan(s) shall be wound up and the units would be redeemed at applicable NAV. The two conditions mentioned above shall be complied within each subsequent calendar quarter, on an average basis, as specified by SEBI. If there is a breach of the 25% limit by any investor over the quarter, a rebalancing period of one month would be allowed and thereafter the investor who is in breach of the rule shall be given 15 days notice to redeem his exposure over the 25% limit. Failure on the part of the said investor to redeem his exposure over the 25% limit within the aforesaid 15 days would lead to automatic redemption by the Mutual Fund on the applicable Net Asset Value on the 15th day of the notice period. The Fund shall adhere to the requirements prescribed by SEBI from time to time in this regard.

C. SPECIAL CONSIDERATIONS

Investors should study the Scheme Information Document carefully in its entirety and should not construe the contents thereof as advice relating to legal, taxation, investment or any other matters. Investors are advised to consult their legal, tax, investment and other professional advisors to determine possible legal, tax, financial or other considerations of subscribing to or redeeming Units, before making a decision to invest/redeem Units.

The tax benefits described in this Scheme Information Document and Statement of Additional Information are as available under the present taxation laws and are available subject to relevant conditions. The information given is included only for general purpose and is based on advice received by the AMC regarding the law and practice currently in force in India and the Unit holders should be aware that the relevant fiscal rules or their interpretation may change. As is the case with any investment, there can be no guarantee that the tax position or the proposed tax position prevailing at the time of an investment in the Scheme will endure indefinitely. In view of the individual nature of tax consequences, each Unit holder is advised to consult his / her own professional tax advisor.

Redemption by the Unit holder due to change in the fundamental attributes of the Scheme(s) or due to any other reasons may entail tax consequences. The Trustee, AMC, Mutual Fund, their directors or their employees shall not be liable for any such tax consequences that may arise.

II. INFORMATION ABOUT THE SCHEME

A. TYPE OF THE SCHEME

An Open Ended Hybrid Scheme Investing Predominantly In Equity And Equity Related Instruments

B. INVESTMENT OBJECTIVE OF THE SCHEME

The investment objective of the Scheme would be to generate long term Capital appreciation and current income with reduced volatility by investing in a judicious mix of a diversified portfolio of equity and equity related investments, debt and money market instruments.

C. ASSET ALLOCATION PATTERN

Under normal circumstances, the anticipated asset allocation pattern of the Scheme would be as under:

	Indicative Allocation		Risk Profile
	Minimum	Maximum	
Equity, Equity related instruments and Derivatives	65%	80%	Very High
Debt instruments (including fixed/ floating rate debt instruments) and Money Market instruments	20%	35%	Low to Moderate

The scheme will not invest in Repo of Corporate Bonds, Credit Default Swap, Unrated Securities, securitized debt, ADRs/ GDRs/foreign securities and overseas ETFs. The scheme will also not undertake any 'Short Selling' or 'Securities Lending' activities.

The Scheme can also take derivative exposure up to 50 % of the net assets of the Scheme, subject to the limits as specified by SEBI, from time to time.

The total exposure related to option premium paid will not exceed 20% of the net assets of the scheme.

As per Para 12.24.1 of SEBI Mutual Funds Master Circular No. SEBI/HO/IMD/IMD-PoD-1/P/CIR/2023/74 dated May 19, 2023 "The cumulative gross exposure through equity, debt, derivative positions (including commodity and fixed income derivatives), repo transactions and credit default swaps in corporate debt securities, Real Estate Investment Trusts (REITs), Infrastructure Investment Trusts (InvITs), other permitted securities/assets and such other securities/assets as may be permitted by the Board from time to time should not exceed 100% of the net assets of the scheme."

The Scheme may enter into plain vanilla interest rate swaps for hedging purposes. Exposure to a single counterparty in such transactions will not exceed 10% of the net assets of the scheme.

Investments in Mutual Fund or in the schemes under the management of any other asset management company shall not exceed 5% of the net asset value of the Mutual Fund.

Changes in Investment Pattern:

Rebalancing of Portfolio Rebalancing due to Short Term Defensive Consideration:

Due to market conditions, the AMC may invest beyond the range set out in the asset allocation. Such deviations shall normally be for a short term and defensive considerations as per SEBI Circular no. SEBI/HO/IMD/DF2/CIR/P/2021/024 dated March 4, 2021, and the fund manager will rebalance the portfolio within 30 calendar days from the date of deviation.

Rebalancing due to Passive Breaches:

Further, as per Para 2.9.1 of SEBI Mutual Funds Master Circular No. SEBI/HO/IMD/IMD-PoD-1/P/CIR/2023/74 dated May 19, 2023, as may be amended from time to time, in the event of deviation from mandated asset allocation due to passive breaches (occurrence of instances not arising out of omission and commission of the AMC), the fund manager shall rebalance the portfolio of the Scheme within 30 Business Days. In case the portfolio of the Scheme is not rebalanced within the period of 30 Business Days, justification in writing, including details of efforts taken to rebalance the portfolio shall be placed before the Investment Review Committee of the AMC. The Investment Committee, if it so desires, can extend the timeline for rebalancing up to sixty (60) Business Days from the date of completion of mandated rebalancing period. Further, in case the portfolio is not rebalanced within the aforementioned mandated plus extended timelines the AMC shall comply with the prescribed restrictions, the reporting and disclosure requirements as specified in para 2.9.3 and 2.9.4 of the SEBI Master Circular on Mutual Funds dated May 19, 2023.

Overview of Debt Market :

For a developing economy like India, debt markets are a crucial source of funds. The debt market in India is amongst the largest in Asia. It includes government securities – the largest component - and bonds issued by public sector undertakings, other government bodies, financial institutions, banks and companies. Debt markets are now considered an alternative route to banking channels for finance. Debt Instruments are of various types like Bonds, Debentures, Commercial Papers, Certificates of Deposit, Government Securities (G secs) etc. A brief detail about some of these investment options are given below.

Government Securities- G-Secs are issued by the Reserve Bank of India on behalf of the Government of India. Normally the dated government securities have a period of 1 year to 30 years. These are sovereign instruments generally bearing a fixed interest rate with interest payable semi-annually and principle as per schedule. For shorter term, RBI issues Treasury Bills which are discounted papers. At present T-Bills are issued for 91 days, 182 days & 364 days. G-Secs provide risk free (credit risk) return to investors.

Corporate Bonds- Corporate Bonds are issued by public sector undertakings and private corporations for a wide range of tenors normally up to 15 years although some corporate have also issued perpetual bonds. Compared to government bonds, corporate bonds generally have a higher risk of default. This risk depends, of course, upon the particular corporation issuing the bond, the current market conditions, the industry in which it is operating and the rating of the company. Corporate bond holders are compensated for this risk by receiving a higher yield than government bonds.

Certificate of Deposit- CDs are negotiable money market instruments issued in demat form or as a Usance Promissory Notes. CDs issued by banks should

have a maturity of not less than seven days and not more than one year. Financial Institutions are allowed to issue CDs for a period between 1 year and up to 3 years. CDs normally give a higher return than Bank term deposit. CDs are rated by approved rating agencies(e.g. CARE, ICRA, CRISIL, FITCH) which considerably enhances their tradability in secondary market. CDs are issued in denominations of Rs.1 Lac and in the multiples of Rs. 1 Lac thereafter. Commercial Papers- A CP is a short term security (7 days to 365 days) issued by a corporate entity (other than a bank), at a discount to the face value. One can invest in CPs starting from a minimum of 5 lacs (face value) and multiples thereof. CPs are rated by approved rating agencies (e.g. CARE, ICRA, CRISIL, FITCH). CPs normally give a higher return than fixed deposits & CDs. We deal in investment grade CPs only. CPs can be traded in the secondary market, depending upon demand. An element of credit risk is attached to CPs.

D. WHERE WILL THE SCHEME INVEST?

The corpus of the Scheme will be invested in equity and equity related instruments & in debt and money market instruments.

Subject to the SEBI Regulations and the asset allocation pattern mentioned above for the respective scheme, the Scheme may invest in various types of instruments including, but not limited to, any of the following :

- a) Equity and Equity linked instruments of domestic companies / corporations.
- b) Securities issued, guaranteed or supported by the Central Government or any state government(including but not limited to coupon bearing bonds, zero coupon bonds and treasury bills).
- c) Securities issued by any domestic government agencies, quasi-government or statutory bodies, Public Sector Undertakings, which may or may not be guaranteed or supported by the Central Government or any state government.
- d) Domestic non-convertible securities as well as non-convertible portion of convertible securities, such as debentures, coupon bearing bonds, zero coupon bonds, deep discount bonds, Mibor-linked or other floating rate instruments, premium notes and other debt securities or obligations of public sector undertakings, banks, financial institutions, corporations, companies and other bodies corporate as may be permitted by SEBI / RBI from time to time.
- e) Domestic Commercial Paper (CP), Certificate of Deposits (CD), Bills Rediscounting, triparty repo on Government securities or treasury bills, and other Money Market Instruments as may be permitted by SEBI / RBI from time to time.
- f) Domestic derivatives.
- g) Deposits with domestic banks and other bodies corporate as may be permitted by SEBI from time to time.
- h) Any other domestic debt and money market instruments that may be available from time to time.

Investments in other schemes

The scheme may invest in another scheme under the same asset management company or any other mutual fund without charging any fees, provided that aggregate inter-scheme investments made by all schemes under the same management or in schemes under the management of any other asset management company shall not exceed 5% of the net asset value of the mutual fund.

INVESTMENTS IN DERIVATIVE INSTRUMENTS

Brief note on investment in derivative instruments

As part of the Fund Management process, the Trustee may permit the use of derivative instruments such as index futures, stock futures and options contracts, warrants, convertible securities, swap agreements, Forward Rate Agreement (FRA) or any other derivative instruments that are permissible or may be permissible in future under applicable regulations and such investments shall be in accordance with the investment objectives of the scheme.

Index futures/options are meant to be an efficient way of buying/selling an index compared to buying/selling a portfolio of physical shares representing an index for ease of execution and settlement. Index futures/options can be an efficient way of achieving the scheme's investment objective. On the fixed income side, an interest rate swap agreement from fixed rate to floating rate is an example of how derivatives can be an effective hedge for the portfolio in a rising interest rate environment.

Derivatives can be either exchange traded or can be over the counter (OTC). Exchange traded derivatives are listed and traded on Stock Exchanges whereas OTC derivative transactions are generally structured between two counterparties.

Derivatives may be high risk - high return instruments, upon leveraging. As they are highly leveraged, a small price movement in the underlying security could have a large impact on their value and may also result in a loss.

Position Limits :

The schemes may enter into derivative transactions in line with the guidelines prescribed by SEBI from time to time. The schemes may take exposure in derivatives up to a maximum of 50% of its AUM. These limits will be reviewed by the AMC from time to time.

Currently, the position limits for Mutual Funds and its schemes, as permitted by the SEBI Regulations, are as under:

The cumulative gross exposure through equity, debt and derivative positions should not exceed 100% of the net assets of the scheme. Exposure due to hedging positions may not be included in the above mentioned limit subject to the following:

- Hedging positions are the derivative positions that reduce possible losses on an existing position in securities and till the existing position remains.
- Hedging positions cannot be taken for existing derivative positions. Exposure due to such positions shall have to be added and treated under limits mentioned above.
- Any derivative instrument used to hedge has the same underlying security as the existing position being hedged.
- The quantity of underlying associated with the derivative position taken for hedging purposes does not exceed the quantity of the existing position against which hedge has been taken.
- Exposure due to derivative positions taken for hedging purposes in excess of the underlying position against which the hedging position has been taken, shall be treated under the limits mentioned above.

Further, the total exposure related to option premium paid must not exceed 20% of the net assets of the scheme. Cash or cash equivalents with residual maturity of less than 91 days may be treated as not creating any exposure.

Mutual Funds shall not write options or purchase instruments with embedded written options.

i. Position limit for Mutual Funds in index options contracts :

1. The Mutual Fund position limit in all index options contracts on a particular underlying index shall be Rs. 250 crore or 15% of the total open interest of the market in index options, whichever is higher, per Stock Exchange.
2. This limit would be applicable on open positions in all options contracts on a particular underlying index.

ii. Position limit for Mutual Funds in index futures contracts :

1. The Mutual Fund position limit in all index futures contracts on a particular underlying index shall be Rs. 1000 crore or 15% of the total open interest of the market in index futures, whichever is higher, per Stock Exchange.
2. This limit would be applicable on open positions in all futures contracts on a particular underlying index.

iii. Additional position limit for hedging :

In addition to the position limits at point (i) and (ii) above, Mutual Funds may take exposure in equity index derivatives subject to the following limits :

1. Short positions in index derivatives (short futures, short calls and long puts) shall not exceed (in notional value) the Mutual Fund's holding of stocks.
 2. Long positions in index derivatives (long futures, long calls and short puts) shall not exceed (in notional value) the Mutual Fund's holding of cash, government securities, T-Bills and similar instruments.
- iv. **Position limit for Mutual Funds for stock based derivative contracts :**
The Mutual Fund position limit in a derivative contract on a particular underlying stock, i.e. stock option contracts and stock futures contracts, stand modified in the following manner : -
1. For stocks having applicable market-wise position limit (MWPL) of Rs.500 crores or more, the combined futures and options position limit shall be 20% of applicable MWPL or Rs.300 crores, whichever is lower and within which stock futures position cannot exceed 10% of applicable MWPL or Rs. 150 crores, whichever is lower.
 2. For stocks having applicable market-wise position limit (MWPL) less than Rs.500 crores, the combined futures and options position limit would be 20% of applicable MWPL and futures position cannot exceed 20% of applicable MWPL or Rs.50 crore whichever is lower.
- v. **Position limit for each scheme of a Mutual Fund :**
The position limits for each scheme of mutual fund and disclosure requirements shall be identical to that prescribed for a sub-account of a FII. Therefore, the scheme-wise position limit/disclosure requirements shall be -
1. For stock option and stock futures contracts, the gross open position across all derivative contracts on a particular underlying stock of a scheme of a mutual fund shall not exceed the higher of: 1% of the free float market capitalisation (in terms of number of shares)

Or

- 5% of the open interest in the derivative contracts on a particular underlying stock (in terms of number of contracts)
2. This position limits shall be applicable on the combined position in all derivative contracts on an underlying stock at a Stock Exchange.
 3. For index based contracts, Mutual Funds shall disclose the total open interest held by its scheme or all schemes put together in a particular underlying index, if such open interest equals to or exceeds 15% of the open interest of all derivative contracts on that underlying index.

Valuation :

The traded derivatives shall be valued in accordance with the valuation method specified for traded securities (other than money market & debt securities) under sub clauses (i) to (v) of clause 1 of the Eighth Schedule to the Securities and Exchange Board of India (Mutual Funds) Regulations, 1996 as amended from time to time.

The valuation of untraded derivatives shall be done in accordance with the valuation method specified for non-traded securities (other than money market & debt securities) prescribed in sub clauses (i) and (ii) of clause 2 of the Eighth Schedule to the Securities and Exchange Board of India (Mutual Funds) Regulations, 1996 as amended from time to time.

Stock and Index Options :

Option contracts are of two types - Call and Put, the former being the right, but not obligation, to purchase a prescribed number of shares at a specified price before or on a specific expiration date and the latter being the right, but not obligation, to sell a prescribed number of shares at a specified price before or on a specific expiration date. The price at which the shares are contracted to be purchased or sold is called the strike price. Options that can be exercised on or before the expiration date are called American Options, while those that can be exercised only on the expiration date are called European Options. In India, all individual stock options are American Options, whereas all index options are European Options. Option contracts are designated by the type of option, name of the underlying, expiry month and the strike price.

Strategies that employ Options :

Buying a Call Option : Let us assume that the Fund buys a call option of XYZ Ltd. with strike price of Rs. 1000, at a premium of Rs. 25. If the market price of ABC Ltd on the expiration date is more than Rs. 1000, the option will be exercised. The Fund will earn profits once the share price crosses Rs. 1025 (Strike Price + Premium i.e. 1000+25). Suppose the price of the stock is Rs. 1100, the option will be exercised and the Fund will buy 1 share of XYZ Ltd. from the seller of the option at Rs 1000 and sell it in the market at Rs. 1100, making a profit of Rs. 75. In another scenario, if on the expiration date the stock price falls below Rs. 1000, say it touches Rs. 900, the Fund will choose not to exercise the option. In this case the Fund loses the premium (Rs. 25), which will be the profit earned by the seller of the call option.

Risks :

In case of buying options either call/put, the maximum loss would be the premium paid in case of options expiring out of the money.

Buying a Put Option : Let us assume the Fund owns the shares of XYZ Ltd, which is trading at Rs. 500.

The fund wishes to hedge this position in the short-term as it perceives some downside to the stock in the short-term. It can buy a Put Option at Rs. 500/- by paying a premium of say Rs. 10/- In case the stock goes down to Rs. 450/- the fund has protected its downside to only the premium i.e Rs 10/- instead of Rs. 50/-. On the contrary if the stock moves up to say Rs. 550/- the fund may let the Option expire and forego the premium thereby capturing Rs. 40/- upside. The strategy is useful for downside protection at cost of foregoing some upside.

Risks :

In case of buying options either call/put, the maximum loss would be the premium paid in case of options expiring out of the money.

Stock and Index Futures :

The Stock Exchange, Mumbai and the National Stock Exchange have introduced Index futures on BSE Sensex (BSE 30) and Nifty (NSE-50). Generally, three futures of 1 month, 2 months and 3 months are presently traded on these exchanges. These futures will expire on the last working Thursday of the respective month.

There are futures based on stock indices as mentioned above as also futures based on individual stocks. Individual stock futures are also widely used derivative instruments for enhancing portfolio returns. Stock futures trade either at a premium or at discount to the spot prices, usually the level of premium reflective of the cost of carry. Many a times the stock-specific sentiments too have a bearing on Futures as speculators may find futures as a cost-effective way of executing their view on the stock. However such executions usually increase the premium/discount to the spot significantly, thereby giving rise to clean arbitrage opportunities for a fund.

Strategies that employ Index Futures :

Illustrative list of strategies that can employ index futures :

- (a) The fund has an existing equity portion invested in a basket of stocks. In case the fund manager has a view that the equity markets are headed downwards, the fund can then hedge the exposure to equity either fully or partially by initiating short futures positions in the index. A similar position in the long direction can also be initiated by the fund to hedge its position of cash and permissible equivalents. The extent to which this can be done is determined by existing guidelines.
- (b) To the extent permissible by extant regulations the scheme can initiate a naked short position in an underlying index future traded on a recognized stock exchange.

In case the Nifty near month future contract trading at say, 1850, and the fund manager has a view that it will depreciate going forward, the fund can initiate a sale transaction of nifty futures at 1850 without holding a portfolio of equity stocks or any other underlying long equity position. Once the price falls to 1800 after say, 20 days the fund can initiate a square-up transaction by buying the said futures and book a profit of 50. Correspondingly the fund

can take a long position without an underlying cash/ cash equivalent subject to the extant regulations.

Risks :

The risks associated with index futures are similar to those associated with equity investments. Additional risks could be on account of illiquidity and potential mis-pricing of the futures and the inability of derivatives to correlate perfectly with underlying assets, rates and indices.

The Long position in the Nifty will have as much loss as the gain in the short portfolio if hedged completely and would be vice versa if we were holding long portfolio, short Index.

Strategies that employ Stock Futures :

Sell Spot Buy Future : To illustrate, let us assume the fund holds the stock XYZ Ltd which is trading @ Rs. 100/- at the spot market. If for some reasons the stock trades at Rs. 98 in the futures, the fund may sell the stock and buy the futures. On the date of expiry, the fund may reverse the transactions (i.e. Buy Spot & Sell futures) and earn a risk-free Rs. 2/- (2% absolute) on its holdings. Since this is done without diluting the fund's view on the underlying stock, the fund will benefit from any upside move i.e. if on the date of futures expiry, the stock is trading at Rs. 110/- the futures too will be trading at Rs. 110/- and the fund will capture the 10% upside the stock provided and along with it the 2% arbitrage too, thereby enhancing returns to 12%.

Risks :

While Futures markets are typically more liquid than the underlying cash market, there can be no assurance that ready liquidity would exist at all points in time for schemes to purchase or close out a specific futures contract.

The risks associated with stock futures are similar to those associated with equity investments. Additional risks could be on account of illiquidity and potential mis-pricing of the futures.

Buy Spot Sell Future : If the fund holds a stock XYZ Ltd which trades @ Rs 100/- at the spot market and is trading at Rs. 102/- in the futures market. The fund may buy the spot and sell the futures and earn the premium of Rs.2 /- which is risk-free. However this strategy can be used only when the fund is sitting in cash and is looking at enhancing the returns on the cash.

Risks :

While Futures markets are typically more liquid than the underlying cash market, there can be no assurance that ready liquidity would exist at all points in time for schemes to purchase or close out a specific futures contract.

The risks associated with stock futures are similar to those associated with equity investments. Additional risks could be on account of illiquidity and potential mis-pricing of the futures.

Sell Future : This helps in shorting the market and taking a direct short position in the market. Futures facilitate a short position if fund manager has a bearish view in the market. Sold Futures can be repurchased any time up to the date of its expiry. If not re-purchased, it is automatically squared-off on the expiry date at Spot Rate.

Risks :

The risks associated with stock futures are similar to those associated with equity investments. Additional risks could be on account of illiquidity and potential mis-pricing of the futures and the inability of derivatives to correlate perfectly with underlying assets, rates and indices.

Buy Future : If the fund wants to initiate a long position in a stock whose spot price is at say, Rs. 100/- and futures is at Rs. 98/-, the fund may just buy the futures contract instead of the spot thereby benefiting from a lower cost option.

Risks :

The risks associated with stock futures are similar to those associated with equity investments. Additional risks could be on account of illiquidity and potential mis-pricing of the futures and the inability of derivatives to correlate perfectly with underlying assets, rates and indices.

Interest Rate Swaps :

The Indian markets have faced high volatility in debt and equity markets. An interest rate swap is a contractual agreement between two counter-parties to exchange streams of interest amount on a notional principal basis. In this, one party agrees to pay a fixed stream of interest amount against receiving a variable or floating stream of interest amount. The variable or floating part is determined on a periodical basis. Mutual Funds may enter into plain vanilla interest rate swaps for hedging purposes. The counter party in such transactions has to be an entity recognized as a market maker by RBI. Further, the value of the notional principal in such cases must not exceed the value of respective existing assets being hedged by the scheme. Exposure to a single counterparty in such transactions should not exceed 10% of the net assets of the scheme.

Let us look at an example of an interest rate swap :

Entity A has a Rs.20 crores, 3 month asset which is being funded through call. Entity B, on the other hand, has deployed in overnight call money market a Rs.20 crores, 3 month liability. Both the entities are taking on an interest rate risk.

To hedge against the interest rate risk, both the entities can enter into a 3 month swap agreement based on say MIBOR (Mumbai Inter Bank Offered Rate). Through this swap, entity B will receive a fixed pre agreed rate (say 8%) and pay NSE MIBOR ("the benchmark rate") which will neutralize the interest rate risk of lending in call. Similarly, entity A will neutralize its interest rate risk from call borrowing as it will pay 8% and receive interest at the benchmark rate.

Assuming the swap is for Rs. 20 crores 1st September to 1st December, Entity A is a floating rate receiver at the overnight compounded rate and Entity B is a fixed rate receiver. On a daily basis, the benchmark rate fixed by NSE will be tracked by them.

On December 1, they will calculate as explained below:

Entity A is entitled to receive daily compounded call rate for 92 days and pay 8% fixed. Entity B is entitled to receive interest on Rs.20 crores @ 8% i.e. Rs.40.33 lakhs, and pay the compounded benchmark rate.

Thus on December 1, if the total interest on the daily overnight compounded benchmark rate is higher than Rs.40.33 lakhs, entity B will pay entity A the difference and vice versa.

Forward Rate Agreement (FRA)

A FRA is basically a forward starting IRS. It is an agreement between two parties to pay or receive the difference between an agreed fixed rate (the FRA rate) and the interest rate (reference rate) prevailing on a stipulated future date, based on a notional principal amount for an agreed period. The only cash flow is the difference between the FRA rate and the reference rate. As is the case with IRS, the notional amounts are not exchanged in FRAs.

Example : Let us assume that a scheme has an investment of Rs.10 crore in an instrument that pays interest linked to NSE MIBOR. Since the NSE MIBOR would vary daily, the scheme is running interest rate risk on its investment and would stand to lose if rates go down. To hedge itself against this risk, the scheme could do an IRS where it receives a fixed rate (assume 10%) for the next 5 days on the notional amount of Rs. 10 crore and pay a floating rate (NSE MIBOR). In doing this, the scheme would effectively lock itself into a fixed rate of 10% for the next five days. The steps would be :

1. The scheme enters into an IRS on Rs. 10 crore from December 1, 2001 to December 6, 2001. It receives a fixed rate of interest at 10% and the counter party receives the floating rate (NSE MIBOR).

The scheme and the counter party exchange a contract of having entered into this IRS.

2. On a daily basis, the NSE MIBOR will be tracked by the counterparties to determine the floating rate payable by the scheme.

3. On December 6, 2001, the counterparties will calculate the following :

The scheme will receive interest on Rs. 10 crore at 10% p.a. for 5 days i.e. Rs.1,36,986/-

The scheme will pay the compounded NSE MIBOR for 5 days by converting its floating rate asset into a fixed rate through the IRS.

If the total interest on the compounded NSE MIBOR rate is lower than Rs. 1,36,986/-, the scheme will receive the difference from the counterparty and vice-versa. In case the interest on compounded NSE MIBOR is higher, the scheme would make a lower return than what it would have made had it not undertaken IRS.

Risks :

Interest rate swaps and FRA require the maintenance of adequate controls to monitor the transactions entered into, the ability to assess the risk that the derivative adds to the portfolio and the ability to forecast failure of another party (usually referred to as the "counter-party") to comply with the terms of the derivatives contract. Other risks in using derivatives include the risk of mis-pricing or improper valuation of derivatives, the credit risk where the danger is that of a counter-party failing to honour its commitment, liquidity risk where the danger is that the derivative cannot be sold at prices that reflect the underlying assets, rates and indices, and price risk where the market price may move in adverse fashion.

As is clear from the above examples, engaging in derivatives has the potential to help the scheme in minimising the portfolio risk and/or improve the overall portfolio returns.

Please note these examples are hypothetical in nature and are given for illustration purposes only.

The actual returns may vary depending on the market conditions.

The AMC retains the right to enter into such derivative transactions as may be permitted by the applicable regulations from time to time.

E. WHAT ARE THE INVESTMENT STRATEGIES?

The scheme follows a blend of value and growth style of investing. The fund will follow a bottom-up approach to stock-picking and choose companies across sectors. The debt portion of the scheme will be invested in high quality fixed income instruments.

i. Investment Strategy

Asset allocation between equities and debt is a critical function in an equity fund. The equity and debt portfolios of the Scheme would be managed as per the respective investment strategies detailed herein: -

- Optimally allocate assets between equity and debt within defined limits. Allocation of assets between Equity and Debt will need to be monitored and reviewed at regular intervals (at least quarterly) through an internal process.
- Actively manage the equity and debt portfolio to realize the scheme objective. Debt and equity exposures would be adequately diversified. Additionally, the portfolio is hedged with covered call strategy by writing call options of the underlying stocks. Debt exposures would be actively managed from both credit and interest rate risk (no duration constraints) perspectives with due consideration given to liquidity of investments. The scheme will invest in equity without any market capitalization or sector/style bias.
- The asset allocation in the fund is designed keeping in mind the necessity of providing consistent returns and maintaining a balance between debt and equity, with occasional alterations.

Equity Investments :

The investment approach would be based on the concept of economic earning power and cash return on investments.

Five basic principles serve as the foundation for this investment approach. They are as follows :

- ❖ Focus on long term growth.
- ❖ View our investments as conferring a proportionate ownership of the business.
- ❖ Maintain a margin of safety (i.e. the price of purchase represents a discount to the intrinsic value of that business).
- ❖ Maintain an equity outlook on the market by regularly monitoring economic trends and investor sentiment.
- ❖ The decision to sell a holding would be based on one of three reasons:
 - The anticipated price appreciation has been achieved or is no longer probable.
 - Alternative investments offer superior total return prospects, or
 - A fundamental change has occurred in the company or the market in which it competes.

Debt Investments :

The Scheme will retain the flexibility to invest in the entire range of debt instruments and money market instruments. Investment in Debt securities and Money Market Instruments will be as per the limits in the asset allocation table of the Scheme, subject to permissible limits laid under SEBI (MF) Regulations. Please refer to section 'WHERE WILL THE SCHEME(S) INVEST' on Page 8.

Derivatives :

Derivatives are financial contracts of predetermined fixed duration, whose values are derived from the value of an underlying primary financial instrument, or index, such as: interest rates, exchange rates, and equities.

The Scheme will endeavour to invest in arbitrage opportunities between spot and futures prices of exchange traded equities. The Scheme will build similar hedge positions that offer an arbitrage potential for e.g. buying the basket of index constituents in the cash segment and selling the index futures and selling the corresponding stock future, etc.

The Scheme will also invest in low risk derivatives strategies. These strategies will involve any combination of cash, futures and options.

The Scheme will invest in opportunities arising out of corporate actions announced in stocks that offer superior risk adjusted returns and IPOs.

Please refer to **INVESTMENTS IN DERIVATIVE INSTRUMENTS** under the section 'WHERE WILL THE SCHEME(S) INVEST' on Page 8.

For the purpose of identifying sector, the scheme shall use AMFI sector definition. However, this limit may not be applicable for Tri-Party Rep/Bank CDs/GOI secs/T-Bills and AAA rated PSU Banks and PFIs.

Though every endeavor will be made to achieve the objectives of the Scheme, the AMC/Sponsors/Trustees do not guarantee that the investment objectives of the Scheme will be achieved. No guaranteed returns are being offered under the Scheme.

ii. Portfolio Turnover

Portfolio Turnover is defined as the lower of the value of purchases or sales as a percentage of the average corpus of the Scheme during a specified period of time. Due to the inherent nature of the Scheme, it is expected that there could be regular subscriptions and redemptions on an ongoing basis. Further, the AMC may have to sell the underlying from time to time to meet ongoing expenses/transaction costs or redemptions. In view of the above, it will difficult to provide an estimate/range with a reasonable measure of accuracy for the anticipated portfolio turnover in the Scheme, but it will be the endeavour of the fund manager to maintain an optimal portfolio turnover rate commensurate with the investment objective of the scheme and purchase/ redemption transactions on an ongoing basis in the scheme.

iii. Risk Control

The Mutual Fund has built adequate internal risk management controls and safeguards to ensure that the Scheme is managed in line with the defined investment objectives and in compliance with SEBI (MF) Regulations. The AMC will monitor the tracking error on an ongoing basis and

review the performance against the benchmark index and peer group regularly.

All investment decisions, relating to the Scheme, will be undertaken by the AMC in accordance with the Regulations and the investment objectives specified in this SID. All investment decisions taken by the AMC in relation to the Scheme shall be recorded.

The Investment Management Committee (IMC) consisting of senior employees including the MD of the AMC to oversee the Investment function, will be responsible for laying down the broad Investment Policy and the Specific scheme mandates, in addition to monitoring scheme performance and reviewing portfolio strategy. The risk control parameters would be laid down for each scheme based on the objectives of the scheme and prudent fund management practices will ensure that investor monies are invested in the appropriate risk/reward environment. The AMC would ensure that investments are made in accordance with the regulatory / internal guidelines, if any. Internal guidelines may be set by the AMC from time to time and reviewed in line with the market dynamics.

The designated Fund manager of the scheme will be responsible for taking the day-to-day investment decisions and will inter-alia be responsible for asset allocation, security selection and timing of investment decisions.

The Scheme performance would be benchmarked to the CRISIL Equity Fund Index. The fund reserves the right to change the said benchmark and/or adopt one/more other benchmarks to compare the performance of the Scheme.

In case of investments in debt instruments, the AMC aims to identify securities, which offer superior levels of yield at lower levels of risks. With the aim of controlling risks, the investment team of the AMC will carry out requisite credit evaluation of the securities. Rated Debt instruments in which the Scheme invests will be of investment grade as rated by a credit rating agency. The AMC will be guided by the ratings of Rating Agencies such as CRISIL, CARE, ICRA and Fitch or any other rating agencies that may be registered with SEBI from time to time.

The AMC may approach rating agencies such as CRISIL, ICRA, etc for ratings of the scheme. The Scheme may use various derivatives and hedging products from time to time, as would be available and permitted by SEBI, in an attempt to protect the value of the portfolio and enhance Unit holders' interests.

The Scheme may invest in other Schemes managed by the AMC or in the Schemes of any other Mutual Funds, provided it is in conformity to the investment objectives of the Scheme and in terms of the prevailing Regulations. As per the Regulations, no investment management fees will be charged for such investments and the aggregate inter-Scheme investment made by all Schemes of Shriram Mutual Fund or in the Schemes under the management of other asset management companies shall not exceed 5% of the net asset value of the Shriram Mutual Fund. The limit however does not apply to any Fund of Funds scheme. For the present, the Scheme does not intend to enter into underwriting obligations. However, if the Scheme does enter into an underwriting agreement, it would do so after complying with the Regulations.

F. FUNDAMENTAL ATTRIBUTES

The following are the Fundamental Attributes of the scheme, in terms of Regulation 18 (15A) of the SEBI (MF) Regulations :

(i) Type of the scheme

An Open Ended Hybrid Scheme Investing Predominantly In Equity And Equity Related Instruments

(ii) Investment Objective

Please refer to section "INVESTMENT OBJECTIVE OF THE SCHEME" on Page 7

Investment pattern

Please refer to section "Asset Allocation Pattern" on Page 7

(iii) Terms of Issue

- Liquidity Repurchase/ Resale is at Net Asset Value (NAV) related prices with repurchase/ resale loads as applicable (within limits) as specified under SEBI Regulations 1996, the repurchase price shall not be lower than 95% of the NAV.
- Listing is not envisaged as the Scheme is an open-ended Scheme, with the Fund providing for sales and repurchase on a continuous basis.
- Aggregate fees and expenses charged to the scheme - Please refer section "IV FEES AND EXPENSES" for details.
- The Scheme does not provide any safety net or guarantee nor does it provide any assurance regarding the realization of the investment objective of the scheme or in respect of declaration of IDCW.

In accordance with Regulation 18(15A) of the SEBI (MF) Regulations, the Trustees shall ensure that no change in the fundamental attributes of the Scheme(s) and the Plan(s) / Option(s) thereunder or the trust or fee and expenses payable or any other change which would modify the Scheme(s) and the Plan(s) / Option(s) thereunder and affect the interests of Unitholders is carried out unless:

- Comments of the SEBI is obtained before bringing such change(s);
- A written communication about the proposed change is sent to each Unitholder and an advertisement is given in one English daily newspaper having nationwide circulation as well as in a newspaper published in the language of the region where the Head Office of the Mutual Fund is situated; and
- The Unitholders are given an option for a period of 30 days to exit at the prevailing Net Asset Value without any exit load

G. HOW WILL THE SCHEME BENCHMARK ITS PERFORMANCE?

Benchmark Index: On the basis of investment objective of the scheme and in line with the relevant circulars & clarifications, "CRISIL Hybrid 35+65 - Aggressive Index" has been currently selected as the benchmark of the scheme. The Trustee reserves the right to change the benchmark for evaluation of performance of the Scheme from time to time, keeping in mind the investment objective of the Scheme and the appropriateness of the benchmark, subject to the Regulations and other prevalent guidelines.

H. WHO MANAGES THE SCHEME?

I. WHAT ARE THE INVESTMENT RESTRICTIONS?

i. Investment restrictions

Investment restrictions as contained in the Seventh Schedule to SEBI (Mutual Funds) Regulations, 1996 and applicable to the Scheme is provided below -

1. As per Para 12.8.3.1 of SEBI Mutual Funds Master Circular No. SEBI/HO/IMD/IMD-PoD-1/P/CIR/2023/74 dated May 19, 2023. A mutual fund scheme shall not invest more than:

- a) 10% of its NAV in debt and money market securities rated AAA; or
- b) 8% of its NAV in debt and money market securities rated AA; or
- c) 6% of its NAV in debt and money market securities rated A and below issued by a single issuer.

The above investment limits may be extended by up to 2% of the NAV of the scheme with prior approval of the Board of Trustee and Board of Directors of the AMC, subject to compliance with the overall 12% limit specified in clause 1 of Seventh Schedule of MF Regulation.

Provided that such limit shall not be applicable for investments in Government Securities, treasury bills and triparty repo on Government securities or treasury bills:

Provided further that investments within such limit can be made in mortgaged backed securitised debt which are rated not below investment grade by a credit rating agency registered with the Board.

Provided further that such limit shall not be applicable for investments in case of debt exchange traded funds or such other funds as may be specified by the Board from time to time.

2. The scheme shall not invest in unlisted debt instruments including commercial papers, except Government Securities and other money market instruments.

Provided that the scheme may invest in unlisted non-convertible debentures up to a maximum of 10% of the debt portfolio of the scheme subject to such conditions as may be specified by the Board from time to time.

Provided further that the scheme shall comply with the norms under this clause within the time and in the manner as may be specified by the Board from time to time.

Provided further that the norms for investments by mutual fund schemes in unrated debt instruments shall be specified by the Board from time to time.

3. No Mutual Fund under all its schemes should own more than 10% of any company's paid up capital carrying voting rights.
4. Transfers of investments from one scheme to another scheme in the same mutual fund shall be allowed only if,-
 - (a) Such transfers are done at the prevailing market price for quoted instruments on spot basis. In the absence of a traded price, price derived from the last valuation yield shall be used. [Explanation :- "Spot basis" shall have same meaning as specified by stock exchange for spot transactions;]
 - (b) The securities so transferred shall be in conformity with the investment objective of the scheme to which such transfer has been made.
5. Debentures, irrespective of any residual maturity period (above or below one year), shall attract the investment restrictions as applicable for debt instruments as specified under Clause 1 and 1A of Seventh Schedule to the Regulations.
6. The Mutual Fund shall buy and sell securities on the basis of deliveries and shall in all cases of purchases, take delivery of relevant securities and in all cases of sale, deliver the securities.

Provided further that the mutual fund may enter into derivatives transactions in a recognized stock exchange, subject to the framework specified by the Board.

Provided further that sale of government security already contracted for purchase shall be permitted in accordance with the guidelines issued by the Reserve Bank of India in this regard.
7. No mutual fund scheme shall invest more than 10% of its NAV in the equity shares or equity related instruments of any company.
8. The Mutual Fund shall get the securities purchased or transferred in the name of the Mutual Fund on account of the concerned scheme, wherever investments are intended to be of long-term nature.
9. Pending deployment of the funds of the Scheme in securities in terms of the investment objective of the Scheme, the AMC may park the funds of the Scheme in short term deposits of scheduled commercial banks, subject to the guidelines issued by SEBI pursuant to Para 12.16 of SEBI Mutual Funds Master Circular No. SEBI/HO/IMD/IMD-PoD-1/P/CIR/2023/74 dated May 19, 2023 and such other guidelines as may be issued from time to time in this regard.
10. The Scheme shall not make any investment in,-
 - (a) Any unlisted security of an associate or group company of the sponsor; or
 - (b) Any security issued by way of private placement by an associate or group company of the sponsor; or
 - (c) The listed securities of group companies of the sponsor which is in excess of 25% of the net assets.
11. The Scheme shall not make any investment in any fund of funds scheme.
12. The Fund shall not borrow except to meet temporary liquidity needs of the Fund for the purpose of Repurchase/Redemption of Unit or payment of interest and/or IDCW to the Unit holder.

The Fund shall not borrow more than 20% of the net assets of the individual Scheme and the duration of the borrowing shall not exceed a period of 6 months. Further, vide its Best Practice Guidelines Circular No. 71/2017-18 dated March 23, 2018 AMFI has recommended that cost of borrowing made to manage redemptions, to the extent of YTM/ running yield of the fund as on previous day, should be charged to the scheme and any access cost over YTM/ running yield of the previous day may be borne by the AMC, and in case of any reversal subsequently, the same should be disclosed separately.

13. All investments by a mutual fund scheme in equity shares and equity related instruments shall only be made provided such securities are listed or to be listed.

14. 1. As per Para 12.24 of SEBI Mutual Funds Master Circular No. SEBI/HO/IMD/IMD-PoD-1/P/CIR/2023/74 dated May 19, 2023 "The cumulative gross exposure through equity, debt, derivative positions (including commodity and fixed income derivatives), repo transactions and credit default swaps in corporate debt securities, Real Estate Investment Trusts (REITs), Infrastructure Investment Trusts (InvITs), other permitted securities/assets and such other securities/assets as may be permitted by the Board from time to time should not exceed 100% of the net assets of the scheme."

2. The Scheme shall not write options or purchase instruments with embedded written options. Para 12.25.1 of SEBI Mutual Funds Master Circular No. SEBI/HO/IMD/IMD-PoD-1/P/CIR/2023/74 dated May 19, 2023, the scheme shall write call options only under a 'covered call strategy' subject to the conditions as mentioned in the said circular.

Covered Call Strategy: Covered call is a strategy that combines owning underlying asset, along with the option contract of underlying asset. In this strategy we hold a long position in cash in a security and at the same time we writes (Sell) the call option on the same security to generate income through premiums.

This strategy works well when market is looking mildly bullish or almost neutral and holding a underlying security is not looking to make good profit in near term, so we will sell call option to generate extra return from this underlying security.

Risk and benefits of Covered Call Strategy:

Investment Restrictions on writing call options:

Mutual Fund schemes (excluding ETFs and Index funds) can write Call options under a covered strategy for constituent stocks of NIFTY 50 and BSE SENSEX subject to the following:

- The total notional value (taking into account strike price as well as premium value) of call options written by a scheme shall not exceed 15% of the total market value of equity shares held in that scheme.
- The total number of shares underlying the call options written shall not exceed 30% of the unencumbered shares of a particular company held in the scheme. The unencumbered shares in a scheme shall mean shares that are not part of Securities Lending and Borrowing Mechanism (SLBM), margin or any other kind of encumbrances.
- At all points of time the Mutual Fund scheme shall comply with the provisions at points (a) and (b) above. In case of any passive breach of the requirement at paragraph (a) above, the respective scheme shall have 7 trading days to rebalance the portfolio. During the rebalancing period, no additional call options can be written in the said scheme.
- In case a Mutual Fund scheme needs to sell securities on which a call option is written under a covered call strategy, it must ensure compliance with paragraphs (a) and (b) above while selling the securities.
- In no case, a scheme shall write a call option without holding the underlying equity shares. A call option can be written only on shares which are not hedged using other derivative contracts.
- The premium received shall be within the requirements prescribed in terms of SEBI circular dated August 18, 2010 i.e. the total gross exposure related to option premium paid and received must not exceed 20% of the net assets of the scheme.
- The exposure on account of the call option written under the covered call strategy shall not be considered as exposure in terms of clause g. of Para 12.25.8 of SEBI Mutual Funds Master Circular No. SEBI/HO/IMD/IMD-PoD-1/P/CIR/2023/74 dated May 19, 2023.
- The call option written shall be marked to market daily and the respective gains or losses factored into the daily NAV of the respective scheme(s) until the position is closed or expired.

➤ Under Derivatives Strategy:

Writing call options under Covered Call strategy:

A call option gives the holder (buyer) the right but not the obligation to buy an asset by a certain date for a certain price. Covered calls are an options strategy where a person holds a long position in an asset and writes (sells) call options on that same asset to generate an income stream. The Scheme may write call options under covered call strategy, as permitted by Regulations.

Benefits of using Covered Call strategy in Mutual Funds:

The covered call strategy can be followed by the Fund Manager in order to hedge risk thereby resulting in better risk adjusted returns of the Scheme. This strategy is also employed when the Fund Manager has a short-term neutral view on the asset and for this reason holds the asset long and simultaneously takes a short position via covered call option strategy to generate income from the option premium. The strategy offers the following benefits:

- Hedge against market risk - Since the fund manager sells a call option on a stock already owned by the mutual fund scheme, the downside from fall in the stock price would be lower to the extent of the premium earned from the call option.
- Generating additional returns in the form of option premium in a range bound market. Thus, a covered call strategy involves gains for unit holders in case the strategy plays out in the right direction

Illustration – Covered Call strategy using stock call options:

Suppose, a fund manager buys equity stock of ABC Ltd. For Rs. 1000 and simultaneously sells a call option on the same stock at a strike price of Rs. 1100. The scheme earns a premium of say, Rs. 50. Here, the fund manager does not think that the stock price will exceed Rs. 1100.

Scenario 1: Stock price exceeds Rs. 1100

The call option will get exercised and the fund manager will sell the stock to settle his obligation on the call at Rs. 1100 (earning a return of 10% on the stock purchase price). Also, the scheme has earned a premium of Rs. 50 which reduced the purchase cost of the stock (Rs. 1000 – Rs. 50 = Rs. 950). Net Gain – Rs. 150

Scenario 2: Stock prices stays below Rs. 1100

The call option will not get exercised and will expire worthless. The premium earned on call option will generate alpha for the scheme. Net Gain – Rs. 50.

Risks for writing covered call options for equity shares:

- Writing call options are highly specialized activities and entail higher than ordinary investment risks. In such investment strategy, the profits from call option writing is capped at the option premium, however the downside depends upon the increase in value of the underlying equity shares. This downside risk is reduced by writing covered call options.
- The Scheme may write covered call option only in case it has adequate number of underlying equity shares as per regulatory requirement. This would lead to setting aside a portion of investment in underlying equity shares. If covered call options are sold to the maximum extent allowed by regulatory authority, the scheme may not be able to sell the underlying equity shares immediately if the view changes to sell and exit the stock. The covered call options need to be unwound before the stock positions can be liquidated. This may lead to a loss of opportunity, or can cause exit issues if the strike price at which the call option contracts have been written become illiquid. Hence, the scheme may not be able to sell the underlying equity shares, which can lead to temporary illiquidity of the underlying equity shares and result in loss of opportunity.

- c. The writing of covered call option would lead to loss of opportunity due to appreciation in value of the underlying equity shares. Hence, when the appreciation in equity share price is more than the option premium received the scheme would be at a loss.
- d. The total gross exposure related to option premium paid and received must not exceed the regulatory limits of the net assets of the scheme. This may restrict the ability of Scheme to buy any options.

3. The total exposure related to option premium paid shall not exceed 20% of the net assets of the scheme.
4. Exposure due to hedging positions may not be included in the above mentioned limits subject to the following:
 - a. Hedging positions are the derivative positions that reduce possible losses on an existing position in securities and till the existing position remains.
 - b. Hedging positions cannot be taken for existing derivative positions. Exposure due to such positions shall have to be added and treated under limits mentioned in Point 1.
 - c. Any derivative instrument used to hedge has the same underlying security as the existing position being hedged.
 - d. The quantity of underlying associated with the derivative position taken for hedging purposes does not exceed the quantity of the existing position against which hedge has been taken.
5. Exposure due to derivative positions taken for hedging purposes in excess of the underlying position against which the hedging position has been taken, shall be treated under the limits mentioned in point 1.
6. Each position taken in derivatives shall have an associated exposure as defined under. Exposure is the maximum possible loss that may occur on a position. However, certain derivative positions may theoretically have unlimited possible loss. Exposure in derivative positions shall be computed as follows :

Position

Long Future

Short Future

Option bought

Exposure

Futures Price * Lot Size * Number of Contracts

Futures Price * Lot Size * Number of Contracts

Option Premium Paid * Lot Size * Number of Contracts.

7. The scheme may enter into plain vanilla Interest Rate Swaps (IRS) for hedging purposes. The value of the notional principal in such cases must not exceed the value of respective existing assets being hedged by the scheme. In case of participation in IRS is through over the counter transactions, the counter party has to be an entity recognized as a market maker by RBI and exposure to a single counterparty in such transactions should not exceed 10% of the net assets of the scheme. However, if mutual funds are transacting in IRS through an electronic trading platform offered by the Clearing Corporation of India Ltd. (CCIL) and CCIL is the central counterparty for such transactions guaranteeing settlement, the single counterparty limit of 10% shall not be applicable.

The Scheme will comply with the other Regulations applicable to the investments of Mutual Funds from time to time.

All the investment restrictions will be applicable at the time of making investments. Apart from the Investment Restrictions prescribed under the Regulations, internal risk parameters for limiting exposure to a particular scrip or sector may be prescribed from time to time to respond to the dynamic market conditions and market opportunities.

- ii. The AMC/Trustee may alter these above stated restrictions from time to time to the extent the Regulations change, so as to permit the Scheme to make its investments in the full spectrum of permitted investments for mutual funds to achieve its respective investment objective.

iii. Investments in other schemes

According to the Clause 4 of Schedule 7 read with Regulation 44(1), of the SEBI (MF) Regulations, 1996: "A scheme may invest in another scheme under the same asset management company or any other mutual fund without charging any fees, provided that aggregate inter-scheme investments made by all schemes under the same management or in schemes under the management of any other asset management company shall not exceed 5% of the net asset value of the mutual fund."

iv. AMC's investments in the Scheme

As per the amended regulations i.e. sub-regulation 16(A) in Regulation 25 of SEBI (Mutual Funds) Regulations, 1996 ('MF Regulations'), asset management companies ('AMCs') are required to invest such amount in such scheme(s) of the mutual fund, based on the risk associated with the scheme, as may be specified by the Board from time to time.

As per sub-regulation 17 in Regulation 25 of SEBI (Mutual Funds) Regulations, 1996 ('MF Regulations'), The asset management company shall not invest in any of its scheme, unless full disclosure of its intention to invest has been made in the offer documents, in case of schemes launched after the notification of Securities and Exchange Board of India (Mutual Funds) (Amendment) Regulations, 2011:

Provided that an asset management company shall not be entitled to charge any fee on its investment in that scheme.

The Trustee/AMC may alter these above stated restrictions of Section I - (What Are The Investment Restrictions) from time to time to the extent the SEBI (MF) Regulations change, so as to permit the Scheme(s) to make its investments in the full spectrum of permitted investments for mutual funds to achieve its respective investment objective.

SEGREGATION OF PORTFOLIOS:

In order to ensure fair treatment to all investors in case of a Credit Event and to deal with liquidity risk, SEBI as per Para 4.4.1 of SEBI Mutual Funds Master Circular No. SEBI/HO/IMD/IMD-PoD-1/P/CIR/2023/74 dated May 19, 2023, as amended from time to time has allowed creation of Segregated Portfolio of debt and money market instruments by mutual fund schemes.

The AMC may create a segregated portfolio of debt and money market instruments in a mutual fund scheme in case of a credit event and to deal with liquidity risk.

In this regard, the term 'segregated portfolio' shall mean a portfolio comprising of debt or money market instrument affected by a credit event, that has been segregated in a mutual fund scheme and the term 'main portfolio' shall mean the scheme portfolio excluding the segregated portfolio. The term 'total portfolio' shall mean the scheme portfolio including the securities affected by the credit event.

The AMC at its and discretion may create Segregated Portfolio in the Scheme, with the approval of the Trustees, subject to the following:

A segregated portfolio may be created in a mutual fund scheme in case of a credit event at issuer level i.e. downgrade in credit rating by a SEBI registered Credit Rating Agency (CRA), as under:

- a. Downgrade of a debt or money market instrument to 'below investment grade', or
- b. Subsequent downgrades of the said instruments from 'below investment grade', or
- c. Similar such downgrades of a loan rating.

In case of difference in rating by multiple CRAs, the most conservative rating shall be considered. Creation of segregated portfolio shall be based on issuer level credit events as detailed above and implemented at the ISIN level.

In terms of Para 4.4.3.3 of SEBI Mutual Funds Master Circular No. SEBI/HO/IMD/IMD-PoD-1/P/CIR/2023/74 dated May 19, 2023, segregated portfolio may be created of unrated debt or money market instruments by mutual fund schemes of an issuer that does not have any outstanding rated debt or money market instruments. Such segregated portfolio can be created only in case of actual default of either the interest or principal amount.

Process for creation of Segregated Portfolio:

1. The AMC shall decide on creation of segregated portfolio on the day of credit event, as per the process laid down below:
 - a. The AMC shall seek approval of Trustees, prior to creation of the segregated portfolio.
 - b. The AMC shall immediately issue a press release disclosing its intention to segregate such debt and money market instrument and its impact on the investors. It shall also be disclosed that the segregation shall be subject to trustee approval. Additionally, the said press release shall be prominently disclosed on the website of the AMC.
 - c. The AMC shall ensure that till the time the Trustee approval is received, which in no case shall exceed 1 business day from the day of credit event, the subscription and redemption in the scheme shall be suspended for processing with respect to creation of units and payment on redemptions.
2. Upon receipt of approval from Trustees:
 - a. The segregated portfolio shall be effective from the day of credit event
 - b. The AMC shall issue a press release immediately with all relevant information pertaining to the segregated portfolio. The said information shall also be submitted to SEBI.
 - c. An e-mail or SMS should be sent to all unit holders of the concerned scheme.
 - d. The NAV of both segregated and main portfolio shall be disclosed from the day of the credit event.
 - e. All existing investors in the scheme as on the day of the credit event shall be allotted equal number of units in the segregated portfolio as held in the main portfolio.
 - f. No redemption and subscription shall be allowed in the segregated portfolio. However, in order to facilitate exit to unit holders in segregated portfolio, AMC shall enable listing of units of segregated portfolio on the recognized stock exchange within 10 working days of creation of segregated portfolio and also enable transfer of such units on receipt of transfer requests.
3. If the trustees do not approve the proposal to segregate portfolio, the AMC shall issue a press release immediately informing investors of the same.

Valuation and processing of subscriptions and redemptions:

1. Notwithstanding the decision to segregate the debt and money market instrument, the valuation shall take into account the credit event and the portfolio shall be valued based on the principles of fair valuation (i.e. realizable value of the assets) in terms of the relevant provisions of SEBI (Mutual Funds) Regulations, 1996 and Circular(s) issued thereunder
2. All subscription and redemption requests for which NAV of the day of credit event or subsequent day is applicable will be processed as per the existing circular on applicability of NAV as under:
 - a. Upon trustees' approval to create a segregated portfolio
 - i. Investors redeeming their units will get redemption proceeds based on the NAV of main portfolio and will continue to hold the units of segregated portfolio.
 - ii. Investors subscribing to the scheme will be allotted units only in the main portfolio based on its NAV.
 - b. In case trustees do not approve the proposal of segregated portfolio, subscription and redemption applications will be processed based on the NAV of total portfolio.

Periodic Disclosures:

In order to enable the existing as well as the prospective investors to take informed decision, the following shall be adhered to:

- a. A statement of holding indicating the units held by the investors in the segregated portfolio along with the NAV of both segregated portfolio and main portfolio as on the day of the credit event shall be communicated to the investors within 5 working days of creation of the segregated portfolio.
 - b. Adequate disclosure of the segregated portfolio shall appear in all scheme related documents, in monthly and half-yearly portfolio disclosures and in the annual report of the mutual fund and the scheme.
 - c. The Net Asset Value (NAV) of the segregated portfolio shall be declared on daily basis.
 - d. The information regarding number of segregated portfolios created in a scheme shall appear prominently under the name of the scheme at all relevant places such as SID, KIM-cum-Application Form, advertisement, AMC and AMFI websites, etc.
 - e. The scheme performance required to be disclosed at various places shall include the impact of creation of segregated portfolio. The scheme performance should clearly reflect the fall in NAV to the extent of the portfolio segregated due to the credit event and the said fall in NAV along with recovery(ies), if any, shall be disclosed as a footnote to the scheme performance.
 - f. The disclosures at paragraph (d) and (e) above regarding the segregated portfolio shall be carried out for a period of at least 3 years after the investments in segregated portfolio are fully recovered/ written-off.
 - g. The investors of the segregated portfolio shall be duly informed of the recovery proceedings of the investments of the segregated portfolio. Status update may be provided to the investors at the time of recovery and also at the time of writing-off of the segregated securities.
3. **TER for the Segregated Portfolio**
 - a. AMC shall not charge investment and advisory fees on the segregated portfolio. However, TER (excluding the investment and advisory fees) can be charged, on a prorata basis only upon recovery of the investments in segregated portfolio.
 - b. The TER so levied shall not exceed the simple average of such expenses (excluding the investment and advisory fees) charged on daily basis on the main portfolio (in % terms) during the period for which the segregated portfolio was in existence.
 - c. The legal charges related to recovery of the investments of the segregated portfolio may be charged to the segregated portfolio in proportion to the amount of recovery. However, the same shall be within the maximum TER limit as applicable to the main portfolio. The legal charges in excess of the TER limits, if any, shall be borne by the AMC.
 - d. The costs related to segregated portfolio shall in no case be charged to the main portfolio.

Investors may also note that the process followed by the AMC/Trust regarding creation of segregated portfolios shall be in accordance with the provisions laid down by SEBI in this regard, from time to time.

Benefits and Features of Creation of Segregated Portfolio:

1. Creation of Segregated portfolio helps ensuring fair treatment to all investors in case of a credit event and helps in managing liquidity risk during such events;
2. Investors redeeming their units will get redemption proceeds based on the NAV of main portfolio and will continue to hold the units of segregated portfolio;

3. Investors subscribing to the scheme will be allotted units only in the main portfolio based on its NAV;
4. A statement of holding indicating the units held by the investors in the segregated portfolio along with the NAV of both segregated portfolio and main portfolio as on the day of the credit event shall be communicated to the investors within 5 working days of creation of the segregated portfolio;
5. Adequate disclosure of the segregated portfolio shall appear in all scheme related documents, in monthly and half-yearly portfolio disclosures and in the annual report of the mutual fund and the scheme; and
6. The investors of the segregated portfolio shall be duly informed of the recovery proceedings of the investments of the segregated portfolio. Status update may be provided to the investors at the time of recovery and also at the time of writing-off of the segregated securities.

Notes:

- Investors who invest / subscribe to the units of the Scheme post creation of segregated portfolio shall be allotted units in the Main Portfolio only.
- Investors redeeming their units post creation of segregated portfolio will get redemption proceeds based on NAV of main portfolio and will continue to hold units in Segregated portfolio.
- No redemption and / or subscription shall be allowed in the Segregated Portfolio.
- Units of Segregated portfolio shall be listed on a recognised stock exchange.

Monitoring by Trustees:

In order to ensure timely recovery of investments of the segregated portfolio, trustees shall ensure that:

- a. The AMC puts in sincere efforts to recover the investments of the segregated portfolio.
- b. Upon recovery of money, whether partial or full, it shall be immediately distributed to the investors in proportion to their holding in the segregated portfolio. Any recovery of amount of the security in the segregated portfolio even after the write off shall be distributed to the investors of the segregated portfolio.
- c. An Action Taken Report (ATR) on the efforts made by the AMC to recover the investments of the segregated portfolio is placed in every trustee meeting till the investments are fully recovered/ written-off.
- d. The trustees shall monitor the compliance of this circular and disclose in the half-yearly trustee reports filed with SEBI, the compliance in respect of every segregated portfolio created.

In order to avoid mis-use of segregated portfolio, trustees shall ensure to have a mechanism in place to negatively impact the performance incentives of Fund Managers, Chief Investment Officers (CIOs), etc. involved in the investment process of securities under the segregated portfolio, mirroring the existing mechanism for performance incentives of the AMC, including claw back of such amount to the segregated portfolio of the scheme.

Risk factors associated with creation of Segregated Portfolios:

1. Liquidity risk – A segregated portfolio is created when a credit event occurs at an issuer level in the scheme. This may reduce the liquidity of the security issued by the said issuer, as demand for this security may reduce. This is also further accentuated by the lack of secondary market liquidity for corporate papers in India. As per SEBI norms, the scheme is to be closed for redemption and subscriptions until the segregated portfolio is created, running the risk of investors being unable to redeem their investments. However, it may be noted that, the proposed segregated portfolio is required to be formed within one day from the occurrence of the credit event.

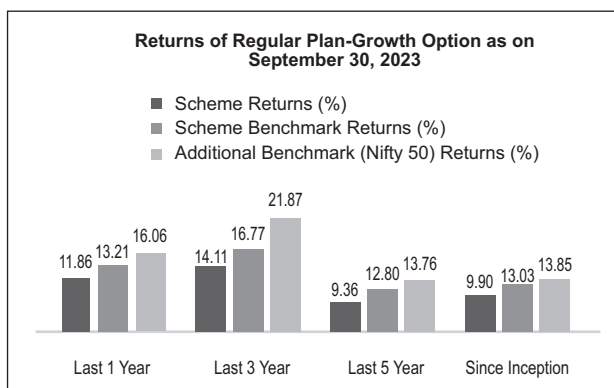

Investors may note that no redemption and subscription shall be allowed in the segregated portfolio. However, in order to facilitate exit to unit holders in segregated portfolio, AMC shall list the units of the segregated portfolio on a recognized stock exchange within 10 working days of creation of segregated portfolio and also enable transfer of such units on receipt of transfer requests. For the units listed on the exchange, it is possible that the market price at which the units are traded may be at a discount to the NAV of such Units. There is no assurance that a deep secondary market will develop for units of segregated portfolio listed on the stock exchange. This could limit the ability of the investors to resell them.

2. Valuation risk - The valuation of the securities in the segregated portfolio is required to be carried out in line with the applicable SEBI guidelines. However, it may be difficult to ascertain the fair value of the securities due to absence of an active secondary market and difficulty to price in qualitative factors.

Appointment of MF Central as Official Point of Acceptance	<p>Based on the Para 16.6 of SEBI Mutual Funds Master Circular No. SEBI/HO/IMD/IMD-PoD-1/P/CIR/2023/74 dated May 19, 2023, to comply with the requirements of RTA inter-operable Platform for enhancing investors' experience in Mutual Fund transactions / service requests, the QRTA's, KFin Technologies Private Limited (KFintech) and Computer Age Management Services Limited (CAMS) have jointly developed MFCentral – A digital platform for Mutual Fund investors.</p> <p>MFCentral is created with an intent to be a one stop portal / mobile app for all Mutual fund investments and service-related needs that significantly reduces the need for submission of physical documents by enabling various digital / phygital services to Mutual fund investors across fund houses subject to applicable T&Cs of the Platform. MFCentral will be enabling various features and services in a phased manner. MFCentral may be accessed using https://mfcentral.com and a Mobile App in future.</p> <p>With a view to comply with all provisions of the aforesaid circular and to increase digital penetration of Mutual funds, Shriram Mutual Fund has designated MFCentral as its Official point of acceptance (DISC – Designated investor Service Centre) w.e.f. 23rd September 2021.</p> <p>Any registered user of MFCentral, requiring submission of physical document as per the requirements of MFCentral, may do so at any of the designated Investor Service centres or collection centres of KFintech or CAMS.</p>

Addition of “MF Utility” platform as an Official Point of Acceptance of Transactions for the Schemes of Shriram Mutual Fund.	<p>Shriram Asset Management Company Limited (‘the AMC’) has entered into an Agreement with MF Utilities India Private Limited (‘MFUI’), for usage of MF Utility (‘MFU’) - a shared services initiative of various Asset Management Companies, which acts as a transaction aggregator for transacting in multiple Schemes of various Mutual Funds with a single form and a single payment instrument.</p> <p>Accordingly, all financial and non-financial transactions pertaining to Scheme(s) of Shriram Mutual Fund(‘the Fund’) can be done through MFU either electronically on the online transaction portal of MFU at www.mfuonline.com or physically through the authorized Points of Service (‘POS’) of MFUI with effect from the respective dates as published on MFUI website against the POS locations. The list of POS of MFUI is published on the website of MFUI at www.mfuindia.com as may be updated from time to time. The online transaction portal of MFU i.e. www.mfuonline.com and the POS locations of MFUI will be in addition to the existing Official Points of Acceptance of Transactions (‘OPAT’) of the AMC.</p> <p>Investors are requested to note that, MFUI will allot a Common Account Number (‘CAN’), a single reference number for all investments in the Mutual Fund industry, for transacting in multiple schemes of various Mutual Funds through MFU and to map existing folios, if any. Investors can create a CAN by submitting the CAN Registration Form (‘CRF’) and necessary documents at the authorised MFUI POS. The AMC and/ or its Registrar and Transfer Agent (‘RTA’) shall provide necessary details to MFUI as may be needed for providing the required services to investors / distributors through MFU. Investors are requested to visit the website of MFUI to download the relevant forms.</p> <p>Applicability of NAV shall be based on time stamping of application at MFUI POS / online and realization of funds in the bank account of the Fund within the applicable cut-off timing. The uniform cut-off time as prescribed by Securities and Exchange Board of India (Mutual Funds) Regulations, 1996 and as mentioned in the Scheme Information Document / Key Information Memorandum of respective schemes shall be applicable. Investors should note that transactions through MFU shall be subject to terms and conditions as stipulated by MFUI / the Fund / the AMC from time to time and any law for the time being in force.</p> <p>For any queries or clarifications related to MFU, please contact the Customer Care of MFUI on 1800-266-1415 (during the business hours on all days except Sunday and Public Holidays) or send an email to clientservices@mfuindia.com.</p>

on the first Rs.500 crores of the daily net assets	2.25%
on the next Rs.250 crores of the daily net assets	2.00%
on the next Rs.1,250 crores of the daily net assets	1.75%
on the next Rs.3,000 crores of the daily net assets	1.60%
on the next Rs.5,000 crores of the daily net assets	1.50%
On the next Rs.40,000 crores of the daily net assets	Total expense ratio reduction of 0.05% for every increase of Rs.5,000 crores of daily net assets or part thereof.
On balance of the assets	1.05%

** excluding additional limit of 0.05% specified in sub regulation (6A)(c) of Regulation 52 of SEBI (Mutual Funds) Regulations, 1996.

- In addition to the expenses indicated above, the scheme will also bear
 - the GST on investment management & advisory fees
 - Expenses not exceeding of 0.30 per cent of daily net assets, if the new inflows from such cities as specified by SEBI from time to time are at least-
 - 30 per cent of gross new inflows in the scheme, or;
 - 15 per cent of the average assets under management (year to date) of the scheme, whichever is higher:

Provided that if inflows from such cities is less than the higher of sub-clause (i) or sub-clause (ii), such expenses on daily net assets of the scheme shall be charged on proportionate basis:

Provided further that expenses charged under this clause shall be utilised for distribution expenses incurred for bringing inflows from such cities:

Provided further that amount incurred as expense on account of inflows from such cities shall be credited back to the scheme in case the said inflows are redeemed within a period of one year from the date of investment.
- Brokerage & transaction costs (including GST) which are incurred for the purpose of execution of trade may be capitalised to the extent of 12bps and 5bps for cash market transactions and derivatives transactions respectively. GST on brokerage and transaction cost paid for execution of trades shall be within the limit prescribed under regulation 52 of the SEBI (Mutual Funds) Regulations, 1996. Any payment towards brokerage and transaction cost, over and above the said 12 bps and 5bps for cash market transactions and derivatives transactions respectively may be charged to the scheme within the maximum limit of Total Expense Ratio (TER) as prescribed under regulation 52 of the SEBI (Mutual Funds) Regulations,

1996. Any expenditure in excess of the said prescribed limit (including brokerage and transaction cost, if any) shall be borne by the asset management company or by the trustee or sponsors.

4. AMC shall annually set apart atleast 2 basis point on daily net assets for investor's education and awareness initiatives.
5. The investor should refer to the website of the mutual fund for the latest expense ratio of the scheme.

These estimates have been made in good faith as per the information available to the Investment Manager based on past experience and are subject to change inter-se. Types of expenses charged shall be as per the SEBI (MF) Regulations.

C. LOAD STRUCTURE

Load is an amount which is paid by the investor to subscribe to the units or to redeem the units from the scheme. This amount is used by the AMC to pay commissions to the distributor and to take care of other marketing and selling expenses. Load amounts are variable and are subject to change from time to time. For the current applicable structure, please refer to the website of the AMC (www.shriramamc.in) or may call your distributor.

Type of Load	Load chargeable (as %age of NAV)
Entry load	Not applicable
Exit Load (During NFO and on an ongoing basis) Redemption/switch-out/Transfer/ Systematic Withdrawal Plan	<p>If redeemed / switched-out within 90 days from the date of allotment :-</p> <ul style="list-style-type: none"> • Upto 12% of units: Nil • More than 12% of units: 1% of applicable Net Asset Value (NAV) <p>If redeemed/switched out after 90 days from the date of allotment: Nil</p>

Illustration on how exit load is chargeable:

Suppose if an investor is allotted 100 units on 1st April, 2018 and again another 50 units on 5th April, 2018 then the exit load shall be charged as under:
If such units i.e. 150 units, as held by the investor, are redeemed on or before 29th June, 2018: Exit load shall be charged in the following manner:

- On 12 % of the units i.e. $150 \times 12\%$ i.e. 18 units: **NIL**
- On more than 12% of such units i.e. $(100+50) - 12\%$ i.e. 132 units: **1% of applicable NAV.**

If such units redeemed on or after 30th June, 2018: Exit load shall be charged in the following manner:

- On 100 units (i.e. on units allotted on April 01, 2018): **NIL** (as redeemed after 90 days from the date of allotment)
- On balance 50 units exit load shall be chargeable as:
 - on 12 % of such units i.e. 6 units: **NIL**
 - on more than 12% of such units i.e. $50 - 12\%$ i.e. 44 units: **1% of applicable NAV**

If such units redeemed on or after 4th July, 2018, Exit load shall be charged in the following manner:

- On 100 units: **NIL** (as redeemed after 90 days from the date of allotment)
- On 50 units (i.e. on units allotted on 5th April, 2018): **NIL** (as redeemed after 90 days from the date of allotment)

GST on exit load, if any, shall be paid out of the exit load proceeds and exit load net of GST, if any, shall be credited to the scheme.

The investor is requested to check the prevailing load structure of the scheme before investing. For any change in load structure AMC will inter alia issue an addendum and display it on the website / Investor Service Centers.

Any imposition or enhancement of Load in future shall be applicable on prospective investments only. AMC shall not charge any load on issue of bonus units and units allotted on reinvestment of IDCW for existing as well as prospective investors. At the time of changing the Load Structure :

1. The addendum detailing the changes will be attached to SIDs and Key Information Memorandum. The addendum may be circulated to all the distributors / brokers so that the same can be attached to all Scheme Information Documents and Key Information Memoranda already in stock.
2. The addendum will be displayed on the website of the Mutual Fund and arrangements will be made to display the addendum in the form of a notice in all the Investor Service Centres and distributors /brokers' office.
3. The introduction of the exit load along with the details will be stamped in the acknowledgement slip issued to the investors on submission of the application form and will also be disclosed in the accounts statement issued after the introduction of such load.
4. A public notice shall be given in respect of such changes in one English daily newspaper having nationwide circulation as well as in a newspaper published in the language of region where the Head Office of the Mutual Fund is situated.
5. Any other measure which the Mutual Fund may consider necessary.

Transaction charges :

In accordance with Para 10.5.1 of SEBI Mutual Funds Master Circular No. SEBI/HO/IMD/IMD-PoD-1/P/CIR/2023/74 dated May 19, 2023, Transaction Charge per subscription of Rs.10, 000/- and above shall be charged from the investors and shall be payable to the distributors/ brokers in respect of applications routed through distributor/ broker relating to Purchases / subscription / new inflows only (lump sum and SIP), subject to the following:

- For Existing / New investors: Rs.100 / Rs.150 as applicable per subscription of Rs.10,000/- and above
- Transaction charge for SIP shall be applicable only if the total commitment through SIP amounts to Rs.10,000/- and above. In such cases the transaction charge would be recovered in maximum 4 successful installments.
- There shall be no transaction charge on subscription below Rs.10,000/-.
- There shall be no transaction charges on direct investments.
- There shall be no transaction charges for transaction other than purchases/subscriptions relating to new inflows such as Switches, etc.
- Transactions carried out through the Stock Exchange platforms for mutual funds shall not be subject to transaction charges.

However the distributors shall have an option to either "Opt-in/Opt-out" from levying transaction charge based on the type of product. Therefore, the "Opt-in/Opt-out" status shall be at distributor level, basis the product selected by the distributor at the Mutual Fund industry level.

The Transaction Charge as mentioned above shall be deducted by the AMC from the subscription amount of the Unit Holder and paid to the distributor and the balance shall be invested in the Scheme. The statement of account shall clearly state that the net investment as gross subscription less transaction charge and give the number of units allotted against the net investment.

The requirement of minimum application amount shall not be applicable if the investment amount falls below the minimum amount required due to deduction of transaction charges from the subscription amount.

The AMCs shall be responsible for any malpractice/mis-selling by the distributor while charging transaction costs.

DIRECT APPLICATIONS

Pursuant to Para 10.4.1 of SEBI Mutual Funds Master Circular No. SEBI/HO/IMD/IMD-PoD-1/P/CIR/2023/74 dated May 19, 2023 no entry load shall be charged for all mutual fund schemes. Therefore, the procedure for waiver of load for direct applications is no longer applicable.
